Side B must be between 110mm & 140mm  
Please see diagram below  
for reference of Side A & B

**Gutter Protector** will not clog, as the cell structure size of the product has been design to allow dust and silt to wash through into your gutter.

**Gutter Protector** contains a built in biocide that is added in the mix during production, preventing the growth of mold, mildew, fungus, algae and moss, **But most important, it also prevents the growth of seeds.**

**Gutter Protector** has a built in fire retardant that is added to the mix during production, so the fire retardant properties will remain throughout the product for it's life span and has been **CSIRO** tested to Australian standard flammability test **AS1530-3-1999.** it also contains a built in UV stabilizer making it **UV** resistant, so will prevent cell degradation from the sun.

**Gutter Protector** will continue to perform at it's peak in all extreme weather conditions, it can withstand extreme heat and cold Temperatures and torrential rains, making it ideal for all Australian weather conditions.

**Gutter Protector** is made from a high quality polyether foam, which has had its cell structure modified, making it extremely porous, so will not absorb or hold water, making it an extremely efficient water and leaf filter for gutters.

# Gutter Protector

takes a quarter of the time to install than most other products, making Gutter Protector The No 1 choice by roofing contractors and DIY.

## Can Gutter Protector be used if I'm collecting rain water for drinking?

Yes, it has passed all AS/NZ Standards for safe drinking water collection. Holds current Certification.

## Is Gutter Protector easy to install?

Yes, there is no need for drilling into your roof or gutter, no need for screws or use of messy silicone, so will not void your roof or gutter warranty.

## Does it matter what type of roof I have?

No, gutter protector is suitable for all types of tiled and color bond roofs.

## How long have foam inserts been around?

They have been installed in thousands of homes across the USA, Canada and some parts of Europe with great success for the last ten years. Has also been one of the most talked about products on American talk shows.

## Can strong winds blow Gutter Protector out of gutters?

No, Gutter Protector fits snugly into the gutter and under the roof edge, the front of Gutter Protector locks into position in the front lip of the gutter.

## Does Gutter Protector hold water weighing down the gutter?

No, Gutter Protector is made from a high quality polyether filtering foam, which has had its cell structure modified, making it extremely porous, so will not absorb or hold water, making it an extremely efficient leaf filter for gutters.

## Does Gutter Protector need to be cleaned?

Generally leaves blow away once they are dry, however we recommend a regular inspection of Gutter Protector be carried out and any built up of leaves be removed.

## Gutter Protector

Performs in all extreme weather conditions

## Gutter Protector

sits inside the gutter so is invisible from ground level
